

13 NEW AI Tools That Use ChatGPT

13 NEW AI Tools That Use ChatGPT

1. MacGPT

With MacGPT you can now speak directly with ChatGPT from anywhere on your Mac. Once you've downloaded the app and logged in with your OpenAI credentials, you'll be able to query the chatbot without opening your browser.

Features

- Inline access
- ChatGPT in the menubar
- ChatGPT in Global text field

Pricing

- Free

13 NEW AI Tools That Use ChatGPT

2. CastMagic

CastMagic helps you with all that tedious post-production stuff like transcription, show notes, summaries, and social content. Upload your MP3 file, select the outputs, and CastMagic will do the rest.

Features

- Transcript
- Custom prompts
- Show notes
- Timestamps
- Quotes & clips

Pricing

- Starts at \$39/mo

13 NEW AI Tools That Use ChatGPT

3. Respell

Respell helps you build no-code AI apps in just a few clicks. There's currently a waitlist for this tool, so it's hard to tell the extent of its abilities but from the few examples, it seems quite easy to set up product integration and workflow automation.

Features

- Augmented creativity
- Workflow automation
- Product integration

Pricing

- N/A

13 NEW AI Tools That Use ChatGPT

4. STORYD

With STORYD you can create a presentation in 60 seconds. You write a few sentences about your topic and STORYD will spit out a presentation complete with graphs and images.

Features

- 500 pre-written presentations
- Script generator
- Custom themes, fonts, colours, logo
- Data presentations

Pricing

- Free limited beta.
- \$18/mo for teams

13 NEW AI Tools That Use ChatGPT

5. SlidesGPT

SlidesGPT is basically a barebones version of STORYD but it's free and will quickly generate your presentation.

Features

- Choose a theme
- Share link of presentation
- Download (Slides, PowerPoint & PDF)

Pricing

- Free

13 NEW AI Tools That Use ChatGPT

6. Gitfluence

This is the ultimate AI-powered Git cheat sheet. You describe the command that you are looking for and Gitfluence (using the unholy power of GPT) will find the command.

Features

- Find Git command
- Copy the command

Pricing

- Free

13 NEW AI Tools That Use ChatGPT

7. ConversAI

ConversAI takes the effort out of messaging and texting. Apparently, the AI learns how you speak and mimics your tone so no one will ever know you're ignoring them. You can also chat with people in different languages.

Features

- Respond in one click
- Summarise long messages
- Integrates with messaging apps
- Automatically detects tone
- Browser integration

Pricing

- £16/mo

13 NEW AI Tools That Use ChatGPT

8. Cody

Cody is an AI business assistant. So instead of just handling personal requests or general queries, it can be trained on your business, your team, your processes, and your clients with your own knowledge base.

Features

- Instant answers to business questions
- Upload any document & build your knowledge base
- Boost employee efficiency
- Support & troubleshooting

Pricing

- Free

13 NEW AI Tools That Use ChatGPT

9. ColorGPT

Identify any color with your phone camera.

Features

- Color name and code from your camera
- Manage colour, copy to clipboard, remove

Pricing

- Free

13 NEW AI Tools That Use ChatGPT

10. Magic Eraser

Remove unwanted things in seconds with Magic Eraser. It works well, maybe even better than Photoshop's content-aware feature.

Features

- Edit Pictures in Bulk
- Download at High Resolution
- No Magic Studio Logo
- Supports JPEG & PNG

Pricing

- Free
- Paid (AU\$14.99/mo) version

13 NEW AI Tools That Use ChatGPT

11. Perplexity

Perplexity has been described as ChatGPT with sources. Ask it a question and it'll give you an answer with all of the sources cited.

Features

- Ask anything
- Ask a follow-up question
- Ask with your voice
- Check the sources

Pricing

- Free

13 NEW AI Tools That Use ChatGPT

12. AskYourPDF

This is a great tool if you are reading a lot of documentation and want to get quick answers, summarize, or even just query.

Features

- PDF Conversations
- Ask questions about the PDF

Pricing

- Free

13 NEW AI Tools That Use ChatGPT

13. WhisperBot

WhisperBot is like Siri for WhatsApp. It can read out messages for you, reply to messages, and transcribe voice to text.

Features

- Speech to text
- Multilingual
- Read your voice message

Pricing

- \$3 for 5 minutes
